Ayman Iktidar

iktidar55@gmail.com | +880 1783068186
GitHub | Google Scholar | Website

Research Interests

Natural Language Processing, Computer Vision, Image Processing, Multimodal learning, Healthcare AI, XAI, Bioinformatics, Cybersecurity.

Education

Chittagong University of Engineering and Technology (CUET) Feb 2019 – Jun 2024
B.Sc. in Computer Science and Engineering *Chattogram, Bangladesh*

- **CGPA: 3.52 / 4.00**
- **Coursework:** Data Structures, Algorithms Design and Analysis, Operating Systems, Database Management Systems, Artificial Intelligence, Machine Learning, Software Engineering, Information Security

Publications

Journal

[J1] U. Mumtahina, **Iktidar, A.**, and S. Alahakoon. Techno-economic assessment of community battery participation in energy and FCAS markets with customer cost reduction. *Energies*, 19(2):445, 2026. [Link]

Conference

[C1] T. Chowdhury, H. Rahaman, M. S. Islam, and **Iktidar, A.**. Federated knowledge distillation for in-hospital mortality prediction in ICU patients with acute kidney injury. In *2026 7th International Conference on Computational Vision and Bio Inspired Computing (ICCVBIC)*, pp. 1306–1311. IEEE, Aug 2026. [Link]

[C2] A. Roy, H. Murad, and **Iktidar, A.**. A multimodal approach to Bangla cyberbullying meme detection in social media. In *2024 27th International Conference on Computer and Information Technology (ICCIT)*, pp. 1886–1891. IEEE, Dec 2024. [Link]

In *2024 6th International Conference on Electrical Engineering and Information & Communication Technology (ICEEICT)*, pp. 398–403. IEEE, May 2024. **Second Best Paper Award. First author.** [Link]

Preprint

[P1] A. Barua, M. M. A. Khan, **Iktidar, A.**, and M. S. Islam. Masked privileged-information distillation for multimodal skin lesion classification under missing clinical metadata. arXiv:2610.03991, 2026. [Link]

Research Experience

Bangla Punctuation Prediction with Mono-lingual Transformers 2023 – 2024
First author, ICEEICT 2024 (Second Best Paper Award) *[C3]*

- Showed that a mono-lingual transformer (BanglaBERT-large with a Bi-LSTM layer) beats multilingual models, including XLM-RoBERTa, on Bangla punctuation prediction.
- Built a five-class Bangla punctuation dataset by adding an Exclamation class to an existing four-class dataset, and released it publicly.
- Set new best results: overall F1 of 0.89 on the four-class task (previous best 0.87) and 0.74 on the five-class task (previous work: 0.50).

Masked Privileged-Information Distillation for Skin Lesion Classification 2026
Co-author, arXiv preprint *[P1]*

- Co-developed a framework where a multimodal teacher trained on complete clinical metadata distills into a 9.2× smaller student trained with randomly masked metadata, so one model handles any level of metadata availability.
- Showed that masked training, not distillation alone, produces graceful degradation on PAD-UFES-20: the masked student loses 7.8 balanced-accuracy points from complete to absent metadata, against 36.6 points without masking.
- The student is 6.2× faster on CPU and scores 0.706 balanced accuracy with no metadata, where the teacher scores 0.452.

Federated Knowledge Distillation for ICU Mortality Prediction 2026
Co-author, ICCVBIC 2026 *[C1]*

- Co-developed a privacy-preserving pipeline for in-hospital mortality prediction in ICU patients with acute kidney injury (6,075 patients, PhysioNet 2012), with four federated clients and a held-out external hospital cohort.
- A student 6.3× smaller than the FedAvg teacher matched its AUROC over 20 seeds (0.830 vs. 0.834) and raised single-run mortality sensitivity from 0.457 to 0.748, the clinically important metric.
- Evaluated zero-shot on the unseen hospital cohort: AUROC 0.829 (20-seed mean).

Multimodal Bangla Cyberbullying Meme Detection 2024
Co-author, ICCIT 2024 *[C2]*

- Co-developed a multimodal classifier combining a Vision Transformer (images) with pre-trained transformers (text), and compared several visual and textual backbones.
- Relabeled the MUTE meme dataset (4,158 memes, code-mixed Bangla and English) into bully and non-bully classes.

Professional Experience

Lecturer, Department of CSE Jan 2025 – Present
Chittagong Independent University (CIU) *Chattogram, Bangladesh*

– Courses taught: Structured Programming, Algorithm Design and Analysis, Software Engineering, Artificial Intelligence, Machine Learning, Compiler Design.

Adjunct Lecturer, Department of CSE Sep 2024 – Dec 2024
International Islamic University Chittagong *Chattogram, Bangladesh*

– Courses taught: Algorithm Design and Analysis, Theory of Computation.

Honors and Service

– Second Best Paper Award, ICEEICT 2024.
– Judge, World Robot Olympiad (Regional Round).
– Competitive programming: 600+ problems solved, 50+ contests, Codeforces max rating 1375 (Ikti55).

Technical Skills

– **Programming and tools:** Python, C++, C, JavaScript, PyTorch, TensorFlow, Git, LaTeX
– **Web:** React, Next.js, Node.js, Express.js, MongoDB, GraphQL
